Three robbers, circa 1960

Army of Shovels, 2018

Without boundaries, without shame, without restrictions, Tomi Ungerer has never limited himself to a single medium nor a single mode of expression. He was always ready to tackle everything!

At the age of 25, leaving for the new world: \$ 60 in his pocket, New York, a stateless among many others... Free, funny and cheeky, Tomi Ungerer seduces the press, magazines, *The New York Times*, *Esquire*, *Life*, *Fortune*. The drawings of the young French are «trend»!

Three robbers, *the moon man*, and we forget the never-ending orgasms, the sex à l'américaine and the fucking machines. Nearly 4000 drawings, sculptures, posters, collages... Tomi Ungerer wavers between the world of children and the adult realm with his shock images marked by a dark, discordant, provocative humor that is his. From Xeroxes to ink and Barbie dolls, the artist never stops imagining, distorting, and confusing.
